CAREER SUMMARY

Front-End Engineer specializing in accessible, pixel-perfect, high-performance web experiences using React, TypeScript, Next.js, Tailwind CSS, and modern UI systems. Experienced in delivering responsive portfolio, business, tourism, e-commerce, CMS, housing, and dashboard interfaces for real clients and production projects. Skilled in creating polished UI components, integrating APIs, optimizing performance, and translating client goals into professional digital products. Graduated with Distinction in Software Engineering.

CORE SKILLS

Frontend	React.js, TypeScript, JavaScript (ES6+), Next.js, Vite, HTML5, CSS3
UI Systems	Tailwind CSS, shadcn/ui, Material UI, Bootstrap, Responsive Design, Accessibility, SEO
Tools & Workflow	REST APIs, Supabase, GSAP, Framer Motion, TanStack Query, Git, GitHub, Figma

PROFESSIONAL EXPERIENCE

Freelance Front-End Developer 2024 - Present

Delivered responsive, modern web interfaces for portfolio, business, tourism, e-commerce, and creative-industry clients. Built polished UI components and production-ready pages with React, TypeScript, Tailwind CSS, and Next.js. Improved performance, accessibility, responsiveness, visual consistency, and client satisfaction through direct collaboration.

Tech: JavaScript, TypeScript, React, Tailwind CSS, Next.js

Front-End Developer - Personal & Open-Source Projects 2023 - 2024

Built responsive landing pages, interactive UI components, dashboards, and API-powered applications. Focused on reusable components, clean front-end architecture, modern JavaScript patterns, and cross-browser compatibility.

Tech: JavaScript, Git, CSS3, REST APIs

Front-End Volunteer Developer - Community Projects 2023

Collaborated with small teams to build pages for community and student initiatives, including contact forms, simple dashboards, and blog layouts. Supported responsive layout work, UI bug fixes, deployment updates, and improvements based on user feedback.

Tech: HTML, CSS, Bootstrap, UI Debugging, GitHub

Web Development Intern 2022 - 2024

Assisted in maintaining front-end components for academic and small business projects. Debugged JavaScript features and improved website speed, responsiveness, and front-end stability.

Tech: React, HTML, CSS, Git, JavaScript

SELECTED PROJECTS

SakanGaza - Volunteer Housing Platform | [Live Project](#)

Built an Arabic RTL platform helping displaced people in Gaza find homes for rent or purchase, including authentication, storage, listings, image uploads, filters, and moderation tools.

Tech: React, TypeScript, Tailwind CSS, shadcn/ui, Supabase

Oday Tourism - Multilingual Tourism Booking Platform | [Live Project](#)

Developed a tourism platform for browsing and booking hotels, travel programs, and airport reception services, with booking cart flow and a complete admin dashboard.

Tech: Next.js, React, TypeScript, Tailwind CSS, Node.js

MarketPro - Multi-Vendor E-Commerce UI | [Live Project](#)

Created a multi-vendor commerce interface with product/category pages, dynamic cart, vendor pages, seller dashboard, and support pages.

Tech: React, TypeScript, Tailwind CSS, shadcn/ui

ELARA - Fashion E-Commerce Website | [Live Project](#)

Designed and developed a luxury fashion e-commerce website with product and collection pages, cart functionality, state management, and responsive performance.

Tech: React, TypeScript, Tailwind CSS

Athr - Bilingual Portfolio & CMS Platform | [Live Project](#)

Built a bilingual portfolio and CMS platform for Dema, including Arabic/English public pages, project and workshop content, smooth interactive motion, and a custom admin panel.

Tech: React, TypeScript, Tailwind CSS, GSAP, Framer Motion, Vite

EDUCATION

University of Palestine - Bachelor of Science in Software Engineering 2025 | Graduated with Distinction

Relevant coursework: Web Application Development, Database Systems, Human-Computer Interaction, Algorithms & Data Structures, Cloud Computing, System Design.
